

A Series Off-Shelve Announcement

June 2, 2017

Dear Sirs/Madams,

Sinpro periodically re-evaluate our product lines and determine to discontinue ***A series** and will remove them from official website on 2017/12/30.

* **A Series** including APU10, APU11, APU15, APU20A, APU20B, APU20C, APU26, APU41A, APU45, APU60A, and ABU60.

We may not update and maintain the safety approvals from now; if you require extreme low operating temperature SPS (-40°C) or require knowing current safety certification status, please contact our sales representative for further discussion.

For old projects which use APU or ABU series as their power supplies, we can still offer it. However, please understand our certification maintenance policy before placing orders; we will automatically remove the safety mark on label if it is expired.

We are sorry for any inconvenience that may be caused, and appreciate your kind understandings. If you have any questions, please feel free to contact us.

Best regards,

April Chen

Marketing Director
